Start of operation for solar power generation systems in Mexico - Activities for Carbon Neutrality -

Industria de Asiento Superior, S.A. de C.V. (President: Kazuya Shishido) and TACHI-S Engineering Latin America, S.A. de C.V. (President: Kazuya Shishido), which are subsidiaries in Mexico of TACHI-S Co., Ltd. (President, CEO&COO: Yuichiro Yamamoto, Headquarter: Akishima, Tokyo), completed an installation of solar power generation system on August 31, and the system began to generate electricity in full swing. It is expected to reduce annual electricity consumption by 631,500 kwh.

■ Overview of solar power generation systems

Location	:	Industria de Asiento Superior, S.A. de C.V. TACHI-S Engineering Latin America, S.A. de C.V. (Aguascalientes, Mexico)
		*Both companies are located in the same building
Annual electricity reduction	:	631,500 kwh
Investment	:	5.1 million MXN
Installed area	:	1,760 m ²
Power generation capacity	:	340 kw

The introduction of the solar power generation system in Mexico is based on the TACHI-S Group's global Carbon Neutrality initiative. This is the third site that introduced the system following the Technical Monozukuri Center in Japan and sewing plant in China. TACHI-S Group is committed to reducing CO2 emissions by 24% by the end of FY24 compared to FY13. (Targets in Japan. We will set our global CO2 emission targets, including overseas group companies, by the end of FY22, taking into account TCFD Risk Analysis and targets by country.) We will continue to increase the number of sites using solar power generation systems as a renewable energy.

■ Activities for Carbon Neutrality

Reduce CO₂ emission by 20% in FY21 (vs FY13)
Promotion of target setting on a global basis including group companies

Initiatives in Japan

Scope 1: Direct emissions from company-owned and controlled resources
Scope 2: Indirect emissions from the consumption of electricity
Scope 3: All indirect emissions excluding those of Scope 1 and 2
(Including upstream and downstream)

Global targets

To be set by the end of FY22, considering TCFD risk analysis and targets by country.
