■ Main Exhibits

1. Concept for Designing and Creating Spaces: Moveable My Room
Future Vision Proposal for Car Interiors (Concept Exhibit)

Here is our proposal for CASE concepts for next-generation vehicles. We have shaped in-car spaces and features that add comfort to daily life and flexibly adapt to various lifestyles.

More details about the Moveable My Room here
(TACHI-S website)

2. Smart Seat: Seat Experience and Display (Concept Exhibit)

We exhibit seats where you can actually sit and experience the "fun" and "comfort" that will be required of seats in the future. At the venue, you can experience an unprecedented level of comfort.

Smart Seat EXCITE

With the concept of "Enjoy every ride, love every ride," we incorporate fun features into our products such as the "Speaker Headrest" for enjoying realistic sound closer to your ears, "Ventilation" to prevent stuffiness and stickiness from long periods of sitting, and "Lighting" to lift your mood when you open the door.

Smart Seat RELAX

With the concept of "Calm long-distance travel in a calm personal space," we incorporate comfortable features into our products, such as "Massage," which enhances comfort and reduces fatigue, a "Power Ottoman" that allows you to extend your legs forward and relax, and a "Power Armrest" that can be adjusted continuously while resting your arm.
